Dear Congresswoman Kirkpatrick:

We're writing to let you know about the positive benefits the Land and Water Conservation Fund (LWCF) has had for our communities.

LWCF state assistance grants have been a crucial support for state and local park expansions and for developing recreational facilities. Across Arizona these state assistance grants have benefited 726 community parks projects in Arizona providing over \$58 million to match with state and local funds. In our corner of the state, this includes trails, baseball fields, better lighting in parks, heritage parks, and pools.

The LWCF was created by Congress in 1965 and is authorized to receive \$900 million annually in federal revenues from oil and gas leasing of the Outer Continental Shelf (OCS). It makes good economic sense to reinvest a small fraction of these federal leasing revenues in permanent natural resource protection.

Unfortunately, the LWCF program has received full funding only once in its history and in recent years has steadily declined to a low in appropriated funding of \$155 million in 2008.

Please review the enclosed materials that highlight some of the projects that have moved forward because of the Land and Water Conservation Fund. These kinds of improvements to our communities are an important part of ensuring our natural, cultural, and recreation heritage.

Sincerely,

Doug Von Gausig
Mayor
